1st road network assessment + categories

1st MS report to COM

EGRIS (Plenary)

EGRIS-SG2 "Methodology Road Safety Assessments"

# Next steps

- According to the Directive 2019/1936/EC Member States shall complete the NWA of motorways and primary roads by the end of 2024.
- A core and challenging step in the process of the assessment is to collect the required data (for the proactive and reactive methodologies); however, this step is challenging during the first implementation, while later it is expected that datasets are subject to few updates.
- The EC acknowledges this challenge and is in the process of examining ways to support Member States with the data collection task.
