Space for liveable cities

The Mobility Pyramide 2010

- **Accessibility:** Liveable cities must provide space for all – public space!
- Matter of fact: Not enough space for **Active Mobility**
- Current overreliance on passive transport brings too much competition between active mode
- Benefitting active transport brings benefits to cities

What's good for liveable cities?

As little personal motorized transport as necessary and as much walking and cycling as possible

What's good for safe cities?

VRU Safety Issues

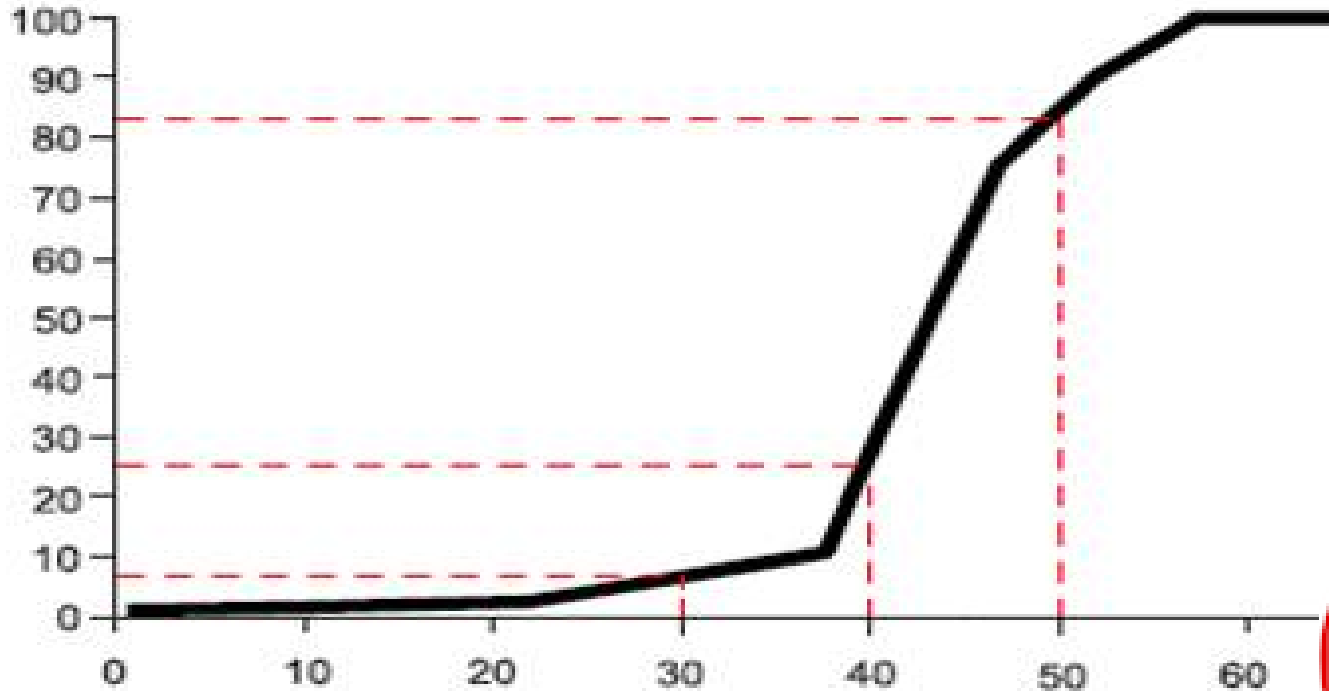

Pedestrians

- Safety in Numbers
 - Junctions
 - Driver behaviour
 - Speed
- or: separate

Cyclists

Most important solution: Safe Speeds

European Citizen's Initiative 30kmh – making streets liveable!
