## MERCURIO

**A European analysis of the road Injuries management System with regard to the social and economic impact of emergency and post-injuries services on national finances and households**

Project details	
Domain	Accidentology
Duration	from 01/09/2012 until 31/08/2015
Website	<a href="http://www.associazioneises.org/en/web/mercurio-project-268">http://www.associazioneises.org/en/web/mercurio-project-268</a>
Other sources	 <a href="#">WP1. Desk review of the RIMS</a>  <a href="#">WP2. Assessment of Social and Economic Burden Road Crashes Place on National Finances</a>  <a href="#">WP3 Assessment of economic and social burden of road accidents on affected households</a>

MERCURIO is a European analysis of the Road Injuries Management System with regard to the social and economic impact of emergency and post-injuries services on national finances and households.

Accidents remain the most important category of external costs of transport in Europe. Their financial strain on affected families is also significant. The need of data in this field is urgent to advocate and motivate policy-makers to action.

MERCURIO project aims at performing an accurate and scientifically based analysis of the social and economic impact of road injuries in the immediate and long-term, assessing, through focused research activities, the related costs they place on public finances and households.

MERCURIO will contribute to the definition of evidence-based and cost-efficient measures to improve emergency and post-injuries services. Research findings will be published and disseminated to involved stakeholders at national and European level.
