Pilot4Safety

Pilot project for common EU Curriculum for Road Safety experts: training and application on Secondary Roads

Project details	
Domain	Road and Tunnel Infrastructure
Duration	from 01/06/2010 until 31/05/2012
Website	http://pilot4safety.fehrl.org
Other sources	 New Curriculum for road safety experts  Safety prevention manual for secondary roads  Evaluation report

PILOT4SAFETY aims to use the Directive 2008/96/CE on road infrastructure safety management as a template for safety application on regional roads.

The Project will apply some Directive's approaches related to training and certification of Road Safety Experts for the application of Road Safety Audit and Road Safety Inspections procedures to some selected secondary roads in the EU Regions represented in the project. The aim is to share good practices and define **common agreed training curricula and tools** for qualification of road safety personnel. Verification in field studies will take place to check if such qualifications can be reciprocally recognized in different European Regions.

The final report will contain a **template for an international certification**, developed taking into account the project's results.
