RIDERSCAN

European Scanning Tour for motorcycle safety

Project details	
Domain	Training, education and campaigns
Duration	from 21/10/2011 until 20/10/2014
Website	http://www.fema-online.eu/riderscan
Other sources	 Training, testing and licensing  Data collection and statistics  Infrastructure  Accident reporting  Research  Traffic management and ITS  Awareness Campaigns  National strategies  Motorcycling Community

Following the conclusions of the OECD/ ITF workshop on motorcycle safety (Lillehammer, 2008) and those of the European Motorcyclists Forum (Brussels, 2010) in the scope of the United Nations' Declarations for a Decade of Action for Road Safety 2011-2020 (Moscow, 2009) and the EC communication "Towards a European Road Safety area: policy orientations on road safety 2011-2020", this 3-year project aims at gathering existing knowledge, identifying needs and disseminating the collected information to relevant stakeholders to promote motorcycle safety throughout Europe.

It will report on areas for European action (legislation, standardization, research and political needs), but also disseminate conclusions to relevant stakeholders at national level.

Coordinator

- [FEMA - The Federation of European Motorcyclists Association](#) (BE)
