RSA Pre Crash Alcohol Report – Published 1/6/2016

38% alcohol-related collisions.

29% of all 867 collisions involved **at least one driver or motorcyclist** with a record of alcohol consumption prior to the collision.

9% of the 867 fatal collisions **involved a pedestrian who had consumed alcohol.**

X4 X5 Half of all drivers and motorcyclists over **four times the current drink driving limit.** A quarter of drivers were **five times over the current legal limit** and a fifth of motorcyclists were five times over the current legal limit.

Alcohol as a Factor in Fatal Collisions

Almost half **(47%)** of the drivers aged between 16 and 24 years had a BAC of 201-251+.

Over half **(52%)** of the pedestrians were on the road with a BAC in excess of 201mg.

Overall, over half **(58%)** of the 330 alcohol-related collisions occurred between 9pm and 5am with a particular peak between 2 and 3am.

Almost **1/3** of the alcohol-related collisions occurred on a Sunday.

Almost **2/3** occurred on the weekend days Friday, Saturday and Sunday.

Overall, the speed limits would suggest **19% of alcohol-related collisions occurred in an urban area and 81% on a more rural environment.**

The majority of drivers who had consumed alcohol were **male.** Almost half **(43%)** of the drivers who had consumed alcohol were aged between 16 and 24 years.

Road Traffic collisions in the Dublin Region, 2011 to 2014 – Temporal patterns
