Fatalities versus seriously injured

Big differences between countries

AIS - Abbreviated Injury Scaling

Abbreviated Injury Score © – copyright by AAAM

AAAM - ASSOCIATION FOR THE ADVANCEMENT
OF AUTOMOTIVE MEDICINE

Dedicated to limiting injuries from motor vehicle crashes

Description of the AIS and MAIS

The Abbreviated Injury Scale (AIS) severity score is on an ordinal scale of 1-6, with one indicating a minor injury and six being maximal (currently untreatable). An AIS code of 9 is used to describe injuries where not enough information is available for more detailed coding. The maximum AIS (MAIS) indicates the most severe injury that a patient sustains.

AIS codification

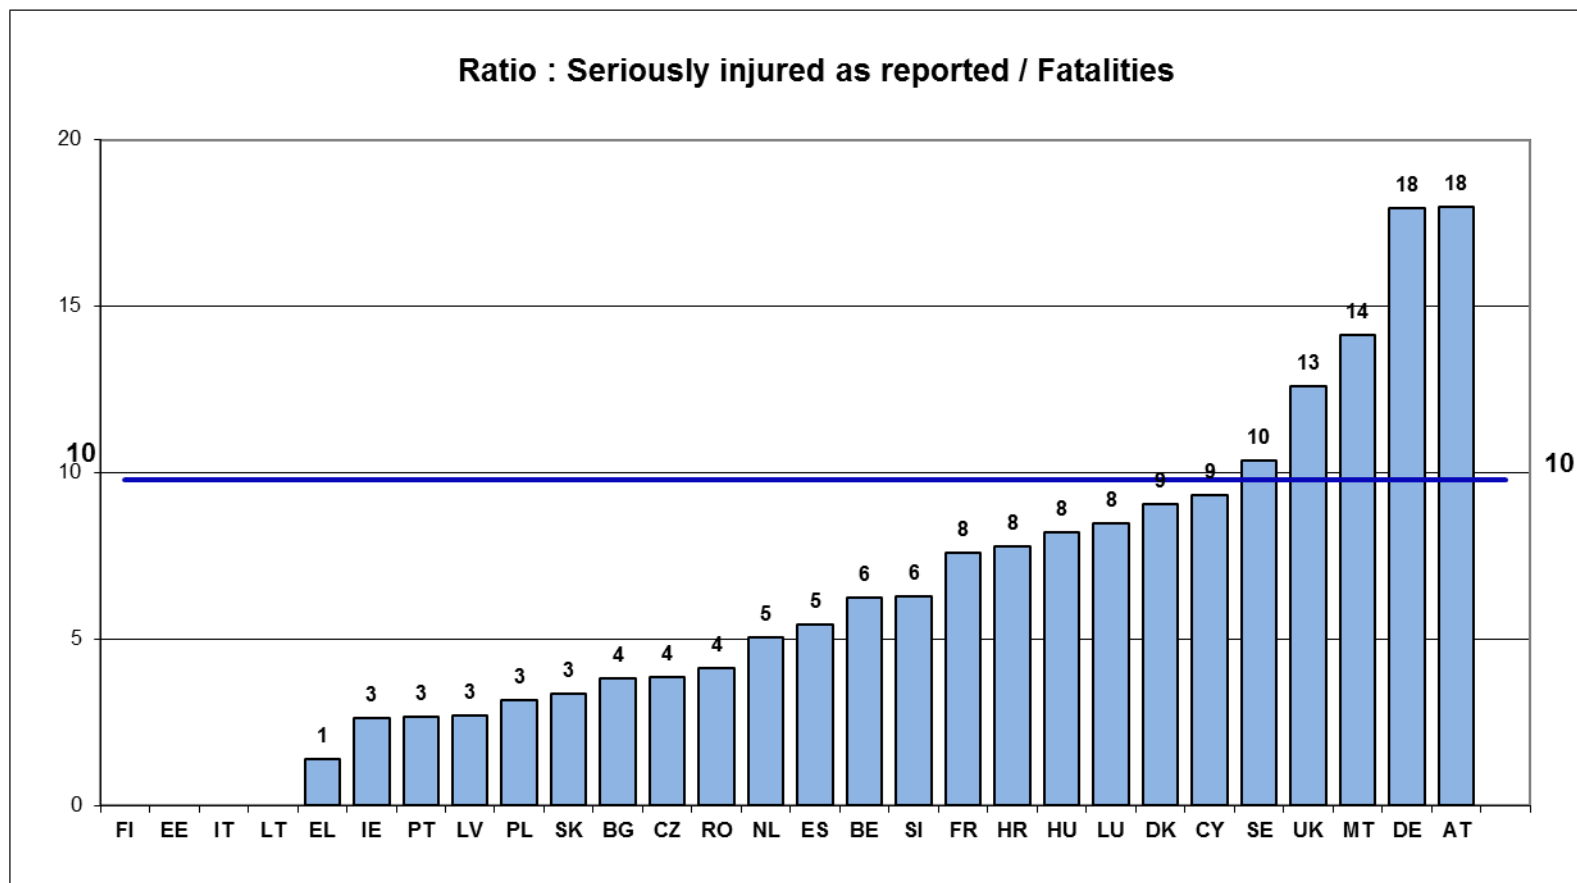

Direct codification on hospital registry from experts
using AIS dictionary

**Conversion from ICD codes to AIS
using mapping table**

The decision remains to each country

Seriously injured as reported by police

Big differences between countries

How to use IAS mapping

Extract ICD codes

- Convert to IAS
- Calculate MAIS by person

How to use IAS mapping

Calculate totals

- MAIS < 3
- MAIS 3 or +
