Study of medical examination for driving licence holders in 4 EU-MS

Project details	
Domain	Fitness to drive
Duration	from 01/03/2004 until 01/03/2006
Website	
Other sources	

The general objective of the study is to evaluate the medical examination for driving licence holders of a group 1 licence in four EU Member States. These countries represent the different models currently in place around Europe. The study would constitute a first practical step towards best practice guidelines, in terms of procedure and periodicity, for such medical examinations.
